

A New Class of Antimicrobial Light In the Workplace

Office suites, shared workspaces and corporate campuses have one thing in common: millions of microbes.

A Hotbed for Germs

Offices are a hotbed for the proliferation of germs that are invisible, grow exponentially and are potentially a hazard to our health. Left undetected on surfaces, these microbes can double in number every 20 minutes, and can become millions overnight. Indoor workplaces can lead to illnesses that spread throughout an office, to our own people, clients, families and the communities where we live.

How Bacteria Grow and Spread in Offices:

- Employees often eat at their desks.
- Shift workers share phones, desks and computer equipment.
- Employees and visitors gather in reception areas, meeting rooms, lunchrooms and hallways.
- And it's common for employees to come to work with mild illnesses.

Routine Cleaning is Not Enough

Nightly cleaning crews vacuum, sweep and empty the trash, but they don't typically spray and wipe surfaces. If they do, it's not enough to effectively combat bacteria. In between cleanings, bacteria grow unchecked, making offices a potential breeding ground for pathogens.

Where do microbes grow in office environments?

Desktops
Computer Keyboards
Mice & Mousepads
Telephones
Desk Chairs

Kitchens & Cafeterias
Food Prep Areas & Counters
Break Room Tables & Chairs
Water Coolers
Rest Rooms

Doorknobs & Push bars
Conference Rooms
Shared Workspaces
Meeting Rooms
Gathering Places

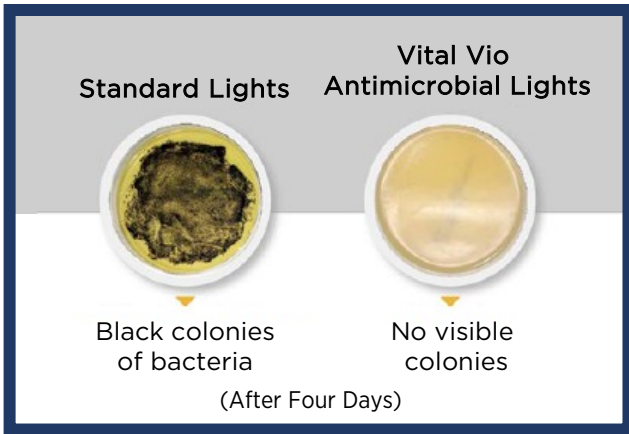

Gyms
Locker Rooms
Carpeting
Trash Receptacles
Handrails & Hallways

Vital Vio's patented antimicrobial light technology is proven to reduce the presence of bacteria, fungi, yeast, mold and mildew.

Vital Vio antimicrobial LED lights are tuned to create an inhospitable environment for microbes to grow.

Vital Vio is a new class of high impact antimicrobial light within the visible light spectrum, unlike harmful UV light, and meets international standards for continuous and unrestricted use around people.

From the largest places to the smallest spaces, Vital Vio is the right tool to effectively reduce microbial buildup inside homes, workplaces, public spaces and throughout industry.

Vital Vio's patented single-diode light technology is available in White Antimicrobial+Light Mode and Violet Enhanced Antimicrobial Mode.

Make Light a Part of Your 21st Century Antimicrobial Defense System.

Standard cleaning only protects intermittently. Bacteria rapidly builds up in between cleanings. Vital Vio's continuous protection knocks down microbial growth.
